

HolaMartiSalom

Sprint 1:

The screenshot shows an IDE window with the file `HolaMartiSalom.java` open. The code defines a `public class HolaMartiSalom` with a `main` method that prints "Hola em dic Martí Salom". The terminal at the bottom shows the command to run the program, which successfully outputs the same message.

```
Archivo  Editar  Selección  Ver  Ir  Ejecutar  ...  <  >  HolaMartiSalom.java

HolaMartiSalom.java > HolaMartiSalom > main(String[])
1  public class HolaMartiSalom {
   Run | Debug
2  public static void main(String[] args) {
3      System.out.println(x:"Hola em dic Martí Salom");
4  }
5  }
```
